examining the context for any proposed development in great detail and relating the new building to its surroundings through an informed character appraisal. This does not imply that any one architectural approach is, by its nature, more likely to succeed than any other. On the contrary, it means that as soon as the application of a simple formula is

[Architecture in context : fitting new buildings with old ...](#)

Architecture in context is neither a cursory attention nor a radical innovation, it is a strong and eloquent visual relationship to the surrounding. Individual building is always seen first as a part of the whole. Creating Places and Spaces that enrich the lives of the people who use them is the foundation of Architects work.
