Although the search for African American ancestry prior to the Civil War is challenging, the difficulties are not always insurmountable. Finding Your African American Ancestors takes you through your ancestors' transition from slavery to freedom, and helps you find them using the federal census, plantation records, and other helpful sources. The book also considers ways to locate runaway slave advertisements, to identify an ancestor's military regiment, and to access

Escaping Slavery is a documentary history of Native Americans in British North America. This study of indigenous peoples captures the lives of numerous individuals who refused to sacrifice their humanity in the face of the violent, changing landscapes of early America.

A stereotypical image of manumission is that of a benign plantation owner freeing his slaves on his deathbed. But as Stephen Whitman demonstrates, the truth was far more complex, especially in border states where manumission was much more common. Whitman analyzes the economic and social history of Baltimore to show how the vigorous growth of the city required the exploitation of rural slaves. To prevent them from escaping and to spur higher production, owners entered into arrangements with their slaves, promising eventual freedom in return for many years' hard work. The Price of Freedom reveals how blacks played a critical role in freeing themselves from slavery. Yet it was an imperfect victory. Once Baltimore's economic growth began to slow, freed blacks were virtually excluded from craft apprenticeships, and European immigrants supplanted them as a trained labor force.

Breaking with historical orthodoxy that claims Bacon's Rebellion marked the death knell of white labor in the Chesapeake and that colonial Virginians achieved racial hegemony in the eighteenth century, Escaping Servitude debunks the myth of the benign institution and the sentimentalized, content servant and reveals revolt and day-to-day resistance.

This gripping study examines slave resistance and protest in antebellum Florida and its local and national impact from 1821 to 1865. Using a variety of sources such as slaveholders' wills and probate records, ledgers, account books, court records, oral histories, and numerous newspaper accounts, Larry Eugene Rivers discusses Florida's unique historical significance as a runaway slave haven dating back to the seventeenth century. In moving detail, Rivers illustrates what life was like for enslaved blacks whose families were pulled asunder as they relocated from the Upper South to the Lower South and how they fought back any way they could to control small parts of their own lives. Against a smouldering backdrop of violence, this study analyzes the various degrees of slave resistance--from the perspectives of both slave and master--and how they differed in various regions of antebellum Florida. Identifying more commonly known slave rebellions such as the Stono, Louisiana, Denmark (Telemaque) Vesey, Gabriel, and the Nat Turner insurrections, Rivers argues persuasively that the size, scope, and intensity of black resistance in the Second Seminole War makes it the largest sustained slave insurrection ever to occur in American history.

The richly diverse population of the mid-Atlantic region distinguished it from the homogeneity of Puritan New England and the stark differences of the plantation South that still dominate our understanding of early America. In *Many Identities, One Nation*, Liam Riordan explores how the American Revolution politicized religious, racial, and ethnic identities among the diverse inhabitants of Pennsylvania, Delaware, and New Jersey. Attending to individual experiences through a close comparative analysis, Riordan explains the transformation from British subjects to U.S. citizens in a region that included Quakers, African Americans, and

Pennsylvania Germans. In the face of a gradually emerging sense of nationalism, varied forms of personal and group identities took on heightened public significance in the Revolutionary Delaware Valley. While Quakers in Burlington, New Jersey, remained suspect after the war because of their pacifism, newly freed slaves in New Castle, Delaware, demanded full inclusion, and bilingual Pennsylvania Germans in Easton, Pennsylvania, successfully struggled to create a central place for themselves in the new nation. By placing the public contest over the proper expression of group distinctiveness in the context of local life, Riordan offers a new understanding of how cultural identity structured the early Jacksonian society of the 1820s as a culmination of the American Revolution in this region. This compelling story brings to life the popular culture of the Revolutionary Delaware Valley through analysis of wide-ranging evidence, from architecture, folk art, clothing, and music to personal papers, newspapers, and local church, tax, and census records. The study's multilayered local perspective allows us to see how the Revolutionary upheaval of the colonial status quo penetrated everyday life and stimulated new understandings of the importance of cultural diversity in the Revolutionary nation.

With the publication of the 1619 Project by The New York Times in 2019, a growing number of Americans have become aware that Africans arrived in North America before the Pilgrims. Yet the stories of these Africans and their first descendants remain ephemeral and inaccessible for both the general public and educators. This groundbreaking collection of thirty-eight biographical and autobiographical texts chronicles the lives of literary black Africans in British colonial America from 1643 to 1760 and offers new strategies for identifying and interpreting

the presence of black Africans in this early period. Brief introductions preceding each text provide historical context and genre-specific interpretive prompts to foreground their significance. Included here are transcriptions from manuscript sources and colonial newspapers as well as forgotten texts. The Earliest African American Literatures will change the way that students and scholars conceive of early American literature and the role of black Africans in the formation of that literature.

"Scarring and the act of scarring are recurrent images in African American literature. In *Scarring the Black Body*, Carol E. Henderson analyzes the cultural and historical implications of scarring in a number of African American texts that feature the trope of the scar, including works by Sherley Anne Williams, Toni Morrison, Ann Petry, Ralph Ellison, and Richard Wright."
