Online Library Judgment Calls Twelve Stories Of Big Decisions And The Teams That Got Them Right

Your guide to making better decisions Despite the dizzying amount of data at our disposal today—and an increasing reliance on analytics to make the majority of our decisions—many of our most critical choices still come down to human judgment. This fact is fundamental to organizations whose leaders must often make crucial decisions: to do this they need the best available insights. In *Judgment Calls*, authors Tom Davenport and Brook Manville share twelve stories of organizations that have successfully tapped their data assets, diverse perspectives, and deep knowledge to build an organizational decision-making capability—a competence they say can make the difference between success and failure. This book introduces a model that taps the collective judgment of an organization so that the right decisions are made, and the entire organization profits. Through the stories in *Judgment Calls*, the authors—both of them seasoned management thinkers and advisers—make the case for the wisdom of organizations and suggest ways to use it to best advantage. Each chapter tells a unique story of one dilemma and its ultimate resolution, bringing into high relief one key to the power of collective judgment. Individually, these stories inspire and instruct; together, they form a model for building an organizational capacity for broadly based, knowledge-intensive decision making. You've read *The Wisdom of Crowds* and *Competing on Analytics*. Now read *Judgment Calls*. You, and your organization, will make better decisions.

“With good judgment, little else matters. Without it, nothing else matters.” Whether we’re talking about United States presidents, CEOs, Major League coaches, or wartime generals, leaders are remembered for their best and worst judgment calls. In the face of ambiguity, uncertainty, and conflicting demands, the quality of a leader’s judgment determines the fate of the entire organization. That’s why judgment is the essence of leadership. Yet despite its importance, judgment has always been a fairly murky concept. The leadership literature has been conspicuously quiet on what, exactly, defines it. Does judgment differ from common sense or gut instinct? Is it a product of luck? Of smarts? Or is there a process for making consistently good calls? Noel Tichy and Warren Bennis have each spent decades studying and teaching leadership and advising top CEOs such as Jack Welch and Howard Schultz. Now, in their first collaboration, they offer a powerful framework for making tough calls when the stakes are high and the right path is far from obvious. They show how to recognize the critical moment before a judgment call, when swift and decisive action is essential, and also how to execute a decision after the call. Tichy and Bennis bring their three-dimensional model to life with interviews with world-class leaders who have thrived or suffered because of their judgment calls. These stories include: • Jeff Immelt, CEO of General Electric, whose judgment to grow through research and development transformed GE into the world’s premier technology growth company. • Joel Klein, chancellor of the New York City Department of Education, who made tough calls about teachers, students, and parents while turning around a troubled school system. • Jim McNerney, CEO of Boeing, whose strategic judgment helped him reinvigorate his company and restore a culture of trust and respect. • The late general Wayne Downing, who found an unexpected opportunity in the midst of crisis when he led the Special Operations raid to capture Manuel Noriega. • A. G. Lafley, CEO of Procter & Gamble, who bet \$57 billion to purchase Gillette and reinvent his company. • Brad Anderson, CEO of Best Buy, who made the call to commit totally to a customer-centric strategy and led his people to execute it. Whether you’re running a small department or a global corporation, *Judgment* will give you a framework for evaluating any situation, making the call, and correcting if necessary during the execution phase. It will show you how to handle the overlapping domains of people, strategy, and crisis management. And it will help you teach your entire team to make the right call more often. No organization can afford to neglect this

Online Library Judgment Calls Twelve Stories Of Big Decisions And The Teams That Got Them Right

crucial discipline—and no previous book has ever brought it into such clear focus.

Deputy District Attorney Samantha Kincaid investigates a possible murder attempt of a thirteen-year-old girl which leads her to a prostitution ring, a serial killer, and a death penalty case testing her limits of judgement.

The New York Times bestselling master of mystery and suspense, J.A. Jance—whom the Chattanooga Times ranks “among the best, if not the best”—brings back her enormously popular series protagonist, Cochise County Sheriff Joanna Brady. With Judgment Call, Jance achieves a new high in crime fiction, as Brady wrestles with her conflicting roles of law officer and mother when her daughter discovers the murdered body of the local high school principal, and the ensuing investigation reveals secrets no parent wants to hear. At once a breathtaking recreation of the rugged landscape of the American Southwest, a moving story of a mother’s concerns for her endangered child, and thrilling masterwork of brutal crime and expert detection, Judgment Call is prime J.A. Jance, a treat for anyone who loves a good cop story wrapped around a superior family drama.

As a follow-up to the successful *Competing on Analytics*, authors Tom Davenport, Jeanne Harris, and Robert Morison provide practical frameworks and tools for all companies that want to use analytics as a basis for more effective and more profitable decision making. Regardless of your company's strategy, and whether or not analytics are your company's primary source of competitive differentiation, this book is designed to help you assess your organization's analytical capabilities, provide the tools to build these capabilities, and put analytics to work. The book helps you answer these pressing questions: What assets do I need in place in my organization in order to use analytics to run my business? Once I have these assets, how do I deploy them to get the most from an analytic approach? How do I get an analytic initiative off the ground in the first place, and then how do I sustain analytics in my organization over time? Packed with tools, frameworks, and all new examples, *Analytics at Work* makes analytics understandable and accessible and teaches you how to make your company more analytical.

From the Nobel Prize-winning author of *Thinking, Fast and Slow* and the coauthor of *Nudge*, a revolutionary exploration of why people make bad judgments and how to make better ones—“a tour de force” (*New York Times*). Imagine that two doctors in the same city give different diagnoses to identical patients—or that two judges in the same courthouse give markedly different sentences to people who have committed the same crime. Suppose that different interviewers at the same firm make different decisions about indistinguishable job applicants—or that when a company is handling customer complaints, the resolution depends on who happens to answer the phone. Now imagine that the same doctor, the same judge, the same interviewer, or the same customer service agent makes different decisions depending on whether it is morning or afternoon, or Monday rather than Wednesday. These are examples of noise: variability in judgments that should be identical. In *Noise*, Daniel Kahneman, Olivier Sibony, and Cass R. Sunstein show the detrimental effects of noise in many fields, including medicine, law, economic forecasting, forensic science, bail, child protection, strategy, performance reviews, and personnel selection. Wherever there is judgment, there is noise. Yet, most of the time, individuals and organizations alike are unaware of it. They neglect noise. With a few simple remedies, people can reduce both noise and bias, and so make far better decisions. Packed with original ideas, and offering the same kinds of research-based insights that made *Thinking, Fast and Slow* and *Nudge* groundbreaking *New York Times* bestsellers, *Noise* explains how and why humans are so susceptible to noise in judgment—and what we can do about it.

Online Library Judgment Calls Twelve Stories Of Big Decisions And The Teams That Got Them Right

U.S. Marshal Jake Taylor has seen plenty of action during his years in law enforcement. But he'd rather go back to Iraq than face his next assignment: protection detail for federal judge Liz Michaels. His feelings toward Liz haven't warmed in the five years since she lost her husband--and Jake's best friend--to possible suicide. How can Jake be expected to care for the coldhearted workaholic who drove his friend to despair? As the danger mounts and Jake gets to know Liz better, his feelings slowly start to change. When it becomes clear that an unknown enemy may want her dead, the stakes are raised. Because now both her life--and his heart--are in mortal danger. Full of the suspense and romance Irene Hannon's fans have come to love, *Fatal Judgment* is a thrilling story that will keep readers turning the pages late into the night.

In an era of rapid change, uncertainty, and hyperpartisanship, when wicked problems abound, tools for solving public problems are more essential than ever. The authors lay out a new theory for collaborative practice in planning, public administration, and public policy. *Planning with Complexity* provides both theoretical underpinnings and extensive case material on collaboration and offers ways of understanding and conducting effective practice. Collaborative rationality means collaboration that is inclusive, informed, grounded in authentic dialogue, and that results in wise and durable outcomes. The scholar-practitioner author team builds on more than 40 years of research, teaching, and practice addressing environmental issues, housing, and transportation. This second edition updates the case studies and adds new examples reflecting the global spread of collaborative practices. It builds on insights that have recently emerged in the literature. More than 75 new references have been incorporated, along with new tables. This book is essential for students, educators, scholars, and reflective practitioners in public policy fields in the 21st century.

This book focuses on the element of leadership that has largely been neglected in the literature: character. Often thought to be a subjective construct, the book demonstrates the concrete behaviors associated with different character dimensions in order to illustrate how these behaviors can be developed, and character strengthened. Based on research involving over 300 senior leaders from different industries, sectors and countries, Crossan, Seijts, and Gandz developed a model for leadership character that focuses on eleven dimensions. The book begins by setting the context for the focus on character in business, asking what character is and whether it can be learned, developed, molded or changed. Next, the book focuses on each dimension of leadership character in turn, exploring its elements and the ways in which it can be applied in a business setting. The book concludes with a summary of the key insights, an exploration of the interactions between the character dimensions, and a call to the reader to reflect on how to develop one's own and others' leadership character. Bridging theory and management practice, *Developing Leadership Character* will interest students and practitioners alike. Readers will benefit not only from a new, robust theoretical framework for leadership character, but will also learn how character can be developed further.
