Modern Refrigeration and Air Conditioning provides an excellent blend of theory, skill development, and service information, making it a leader in the refrigeration and air conditioning field. This comprehensive text teaches both fundamental principles and the service techniques needed to diagnose and remedy refrigeration and HVAC problems. Modern Refrigeration and Air Conditioning has been extensively updated to improve readability and address recent developments in the HVAC-R field. This new edition includes information about the latest equipment, refrigerants, and environmentally responsible service procedures. An all new layout and revised text make the book easier to read and comprehend.

The Modern Refrigeration and Air Conditioning Lab Manual has been designed to accompany the text, Modern Refrigeration and Air Conditioning. Completing these lab activities will help you to master the principles of HVACR operation and service. This Lab Manual is designed for specific hands-on activities. However, these lab activities can be expanded or modified. Completion of an activity will depend on the equipment available, course objectives, and the individual instructor. Each lab activity has specific objectives that are achieved by the completion of the assignment. References to chapters in the Modern Refrigeration and Air Conditioning textbook allow you to review the related content prior to or while performing the activity. The specific equipment required for the activity is listed as an aid to preparation. Review questions are also part of the lab activities to help you fully understand the concepts involved. Safety is an important part of all activities. The primary causes of accidents are carelessness and lack of knowledge of the correct operating and working procedures. It is essential that good safety habits begin in the lab setting. Basic safety procedures for various conditions are identified in this Lab Manual. Each lab activity also includes a list of safety reminders relevant to the lab activity. This Lab Manual will enhance the quality of your training. Through the use of "hands-on" experience, you will learn to size, install, maintain, service, and repair various types of heating, air-conditioning, and refrigeration systems.

Organized to follow the textbook on a chapter-by-chapter basis, providing questions to help the student review the material presented in the chapter. This supplement is a consumable resource, designed with perforated pages so that a given chapter can be removed and turned in for grading or checking.

"This study guide is to be used with the textbook 'Modern refrigeration and air conditioning.' Its intent is to provide you with a thorough background in all aspects of refrigeration and air conditioning."--Introd.

This Ebook is dedicated to those who are eager to learn the HVACR Trade and Refrigerant Charging/Troubleshooting Practices. In this book, you will find Step by Step Procedures for preparing an air conditioning and heat pump system for refrigerant, reading the manifold gauge set, measuring the refrigerant charge level, and troubleshooting problems with the system's refrigerant flow. This book differs from others as it gives key insights into each procedure along with tool use from a technician's perspective, in language that the technician can understand. This book explains the refrigeration cycle of air conditioners and heat pumps, refrigerant properties, heat transfer, the components included in the system, the roles of each component, airflow requirements, and common problems. Procedures Included: Pump Down, Vacuum and Standing Vacuum Test, Recovery and Recovery Bottle Use, Refrigerant Manifold Gauge Set and Hose Connections, Service Valve Positions and Port Access, Preparation of the System for Refrigerant, Refrigerant Charging and Recovery on an Active System, Troubleshooting the Refrigerant Charge and System Operation
