In line with changes in other specialty exams, the MRCGP now
consists of a written exam, a formal clinical skills assessment and
workplace-based assessment. The written paper encompasses
clinical scenarios, hot topics and critical reading, and is in the form
of a 200 question MCQ exam known as the Applied Knowledge
Test (AKT).

The Applied Knowledge Test (AKT) is a computer-based
assessment that forms part of the MRCGP. It tests the knowledge
base behind independent general practice in the UK within the
context of the NHS. Trainees who pass will show they can apply
knowledge at a high enough level for independent practice. The

the new MRCGP, and those GPs undertaking revalidation.

The Fifth Edition of the highly praised Practical Guide for Medical Teachers provides a bridge between the theoretical aspects of medical education and the delivery of enthusiastic and effective teaching in basic science and clinical medicine. Healthcare professionals are committed teachers and this book is an essential guide to help them maximise their performance. This highly regarded book recognises the importance of educational skills in the delivery of quality teaching in medicine. The contents offer valuable insights into all important aspects of medical education today. A leading educationalist from the USA joins the book 's editorial team. The continual emergence of new topics is recognised in this new edition with nine new chapters: The role of patients as teachers and assessors; Medical humanities; Decision-making; Alternative medicine; Global awareness; Education at a time of ubiquitous information; Programmatic assessment; Student engagement; and Social accountability. An enlarged group of authors from more than 15 countries provides both an international perspective and a multi-professional approach to topics of interest to all healthcare teachers.

Insightful modelling of dynamic systems for better business strategy
The business environment is constantly changing and organisations need the ability to rehearse alternative futures. By mimicking the interlocking operations of firms and industries, modelling serves as a 'dry run' for testing ideas, anticipating consequences, avoiding strategic pitfalls and improving future performance. Strategic Modelling and Business Dynamics is an essential guide to credible models; helping you to understand modelling as a creative process for distilling and communicating those factors that drive business success and sustainability. Written by an internationally regarded authority, the book covers all stages of model building, from conceptual to analytical. The book demonstrates a range of in-depth practical examples that vividly illustrate important or puzzling

dynamics in firm operations, strategy, public policy, and everyday life. This updated new edition also offers a rich Learners' website with models, articles and videos, as well as a separate Instructors' website resource, with lecture slides and other course materials (see Related Websites/Extra section below). Together the book and websites deliver a powerful package of blended learning materials that: Introduce the system dynamics approach of modelling strategic problems in business and society Include industry examples and public sector applications with interactive simulators and contemporary visual modelling software Provide the latest state-of-the-art thinking, concepts and techniques for systems modelling The comprehensive Learners' website features models, microworlds, journal articles and videos. Easy-to-use simulators enable readers to experience dynamic complexity in business and society. Like would-be CEOs, readers can re-design operations and then re-simulate in the quest for well-coordinated strategy and better performance. The simulators include a baffling hotel shower, a start-up low-cost airline, an international radio broadcaster, a diversifying tyre maker, commercial fisheries and the global oil industry. "Much more than an introduction, John Morecroft 's Strategic Modelling and Business Dynamics uses interactive ' mini-simulators and microworlds ' to create an engaging and effective learning environment in which readers, whatever their background, can develop their intuition about complex dynamic systems." John Sterman, Jay W. Forrester Professor of Management, MIT Sloan School of Management "Illustrated by examples from everyday life, business and policy, John Morecroft expertly demonstrates how systems thinking aided by system dynamics can improve our understanding of the world around us." Stewart Robinson, Associate Dean Research, President of the Operational Research Society, Professor of Management Science, School of Business and Economics, Loughborough University

This book represents a simple, practical resource for all healthcare

professionals working with dermatological patients with psychological aspects to their disease. The emphasis is on effective guidance rather than exhaustive case reviews, providing readers with a manual on the appropriate way to approach management of the patient in each case. Comprehensive in coverage, but concise in its delivery of information, Psychodermatology in Clinical Practice presents an idealized approach to management of psychodermatology patients within a global perspective, and provides practical tools to aid assessment of patients and in the decision-making process. It is suitable for dermatologists, psychiatrists and psychologists, dermatology nursing staff, primary care physicians and pediatricians.

This book helps candidates pass the AKT (Applied Knowledge Test) paper in the new MRCGP. It features nearly 400 questions using all the formats featured in the AKT exam to provide the reader with the ideal exam preparation. Importantly, detailed answers are also given, complete with references to guide readers to the supporting evidence. This new edition features even more questions in every format:

- a total of 300 extended matching and single best answer questions
- over 50 algorithm completion questions including management of coeliac disease, symptoms and signs suggestive of chronic heart failure, and management of the unconscious adult
- over 30 picture questions, with all photographs presented in full colour
