"A cogent and highly readable book about the politics of energy security in Europe and beyond. Analyzing oil and particularly natural gas developments in a wide area stretching from the Baltic to the Mediterranean sea, Andrea Prontera convincingly demonstrates that energy security is neither a matter of geopolitics, or of markets, but rather of both."

Second, an ESC might deliver tougher European foreign policy positions more in line with Franco-German views. An ESC could get around the CFSP's lowest-common-denominator problem and frustrate the Chinese (and Russian) strategy of picking off one or two smaller EU members through bilateral or economic pressure to block or water down CFSP positions—as, for example, Beijing successfully did ...

It is the reason why European nations do not really pool and share military assets or, if they do so, share only those parts that are the least relevant for national security. As a consequence of Europe being a low-trust political market, the EU's political system was deliberately created as a leadership avoidance scheme.

The European Union's prosperity and security hinges on a stable and abundant supply of energy. The fact that citizens in most Member States have not had to experience any lasting disruption of their energy supply since the oil crises of the 1970s' is a testimony of the success of the Member States and the EU in guaranteeing this.
